

Acceptability of Prejudice Discussion Questions

1. Why are some prejudices acceptable and some are not?
2. How do you, as students from different backgrounds, view members from the different categories (e.g., some people see “rednecks” as farmers whereas others see them as racist)?
3. If you know members of different categories, do you have different perspectives on the various groups?
4. Now that you have talked about the concepts, would you rate any of the people in these social groups differently?
