

### Comfort in Social Situations Survey

Read the following statements and rate what you think your comfort level would be in each situation using the scale below. There are no right or wrong answers. Answer quickly and do not over-think the situations. The way you answer the questions may be different depending on your own social group membership, such as your race/ethnicity, gender, age, size, or ability status. In some cases, you may not think a situation is personally applicable; if so, mark "N/A" in the space provided. After you have completed all sections, follow the instructions to create a total score for each section.
